ACME, ALBERTA, THURSDAY,

APRIL 9th, 1953

\$1.50 a Year; 5c a Copy

Miss Ione Coates is home from Olds where the school term has ended.

Mrs. Ivan Flint of New Denver, B.C. is visiting her parents, Mr. and Mrs. McAlpine.

Mrs. F. F. Ohlhauser is visiting her sons, Reuben and Bill Ohlhauser.

Mr. and Mrs. Andrew Barnes and girls are spending a few days at the home of Mr. R. D. Barnes and family.

Mr. and Mrs. Ray Campbell and daughters of Didsbury spent the Easter weekend at the home of Mr. and Mrs. Stewart Hay. Shirley and Marilyn Hay were also home for the holiday.

The old curling rink will very soon be a memory. Willing hands went to work early Monday morning to pull it down in preparation for the building of the new rink.

The Lions Club held a "Ladies Night" banquet in the Scout Hall on Wed., April 8th.

Mr. Earl Ohlhauser was chairman, while the toast to the Queen was proposed by Mr. Ben Fox. Mr. Ernie Fox proposed the toast to the ladies and Mrs. Ben Fox replied to it. Mr. S. Cameron, zone chairman, was the guest speaker.

A dance followed the banquet with music supplied by the Swallow orchestra.

Gordon McLeod spent Easter at home.

Mr. Paul Goldhammer is a patient in the Three Hills hospital.

Mr. and Mrs. W. Douglas and son, Donald of Lacombe spent Easter at the home of Mr. and Mrs. S. F. Torrance.

A chimney fire broke out in the Crown Lumber house but was extinguished before the fire truck was needed.

ATTENTION—Donate your old batteries, radiators or cast iron to the curling club. Bring them to Ted Schmidt's elevator. Carbon Curling Club.

Mrs. Ben Fox and Mrs. Les Bramley were the delegates from Carbon who attended the three-day 33rd annual convention of the I.O.D.E. which was held in the Palliser hotel on March 31st, April 1st and 2nd. Mrs. Fox was elected one of the provincial councillors.

Mrs. C. Graham was hostess at a tea in honor of Mrs. C. Smith on Wed., April 1st, the occasion being Mrs. Smith's 80th birthday.

Among those present who brought sincere wishes for many more happy birthdays were: Rev. and Mrs. Bruce Hotchkis, Mrs. Tricker, Mrs. G. McFarlane, Mrs. E. Musiko, Mrs. Bert Bramley, Mrs. McAlpine, Mrs. D. Prowse, Mrs. Earl Ohlhauser, Mrs. Walter Hay, Mrs. Ray Mancell and Miss Mary Magessi.

A lovely lunch was served by the hostess, after which Mrs. Smith thanked all those who brought the lovely gifts and cards she received.

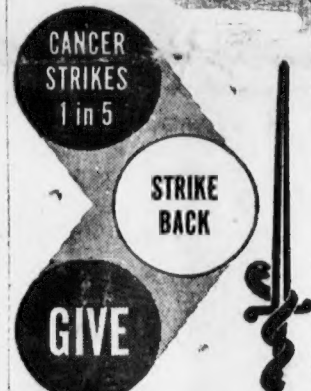

A community shower will be held in the Legion Hall on Wed., April 15th to honor another April bride, Miss Lorretta Harsch.

Miss Roberta Barnes, whose marriage to Mr. R. Piggot took place on Monday, April 6th, was honored at a shower in the Legion Hall on Saturday, April 4th.

Mrs. L. Coates, Mrs. D. Garrett, Mrs. J. Woods, Miss V. Pattison, Mrs. L. Halstead, Mrs. H. Bramley, Mrs. Irvin McCracken, Mrs. S. Cannings, Mrs. George Barber, Mrs. M. Hecktor and Mrs. E. Foster were hostesses at the community bridal shower where a number of lovely gifts were presented to the bride.

FOR SALE—Old Legion Hall.—Apply John Woods, Box 69, Carbon.

FOR SALE—Frame House, 18x32, 2 storey, 5 rooms. Purebred Bulls—Hereford Bull, 2 yrs. old, 5 Hereford Bulls, 1 year old. Sired by Bright Anxiety Mixer, bought from W. Edgar, Innisfail.—Apply Adam Buyer, phone 121 Carbon, Alta.

Cancer Crusade
CANADIAN CANCER SOCIETY
DRUMHELLER, ALBERTA

Miss Vi Pattison was mistress of ceremonies and introduced Mrs. E. Fox and Mrs. R. Shaw who sang a duet, and Misses Vivian and Eileen Sigmund who favored the audience with a mandolin and accordion solo. Loretta and Janet Harsch played a piano and accordion duet, also Mrs. Sam Garrett supplied a contest which was much enjoyed by all.

Brent Bramley, realistically dressed to represent the Easter Bunny, carried a lovely corsage in a tiny gold basket as a gift to

the bride from the hostesses while Mrs. Torrance played and the audience sang "Here Comes Peter Cottontail."

Mauve and pink streamers and bells decorated the hall and the gifts were hidden inside a very large Easter Egg. After the many lovely gifts were looked at, Miss Barnes thanked the hostesses and her many friends, and extended an invitation to them to visit her in her home in Calgary.

At the close of the program a lovely lunch was served by the hostesses.

Larger Demand For Homesteads In Alberta

EDMONTON.—The lands and forests department reported there was "a substantial increase" in demands for Crown lands for homestead purposes in Alberta last year.

Approximately seven townships, or 1,000 quarter-sections, were opened for settlement in 1952 and several additional townships will be opened this year.

At the end of 1952 there were 6,250 homestead leases in force covering 1,520,000 acres of Crown lands providing a net revenue of \$135,956. The department reported aggregate value of forest products cut and removed in 1952 was estimated at \$27,500,000 compared with \$15,900,000 in 1951.

Last year 391,101,000 board feet of lumber, 1,194,000 railway ties and 33,000 cords of fire-killed spruce pulpwood were cut and removed from forests.

The Sudra are the lowest of the Hindoo castes.

New For Spring!

7307

by Alice Brooks

Suit her smartly for spring in this bolero outfit with the whirling, twirling skirt. It's quick crochet in sport yarn—choose a luscious color for her Easter outfit!

Separates to mix, match, or combine. Pattern 7307: crochet directions: Sizes 2, 4, 6, 8 included.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Prairie Publishers Limited,
60 Front Street W., Toronto.
Be sure to write plainly your Name, Address and Pattern Number.

Funny and Otherwise

Little Johnny started the day by introducing the cat to the canary. Next he upset the bowl of goldfish, twisted a knob off the radio, took grand-dad's watch to pieces, and let the bath overflow.

"The little fiend!" his mother said when she was told. I'll punish him for that. Now he shan't go to Sunday School!"

"Much depends on the formation of early habit."

"Don't I know it! When I was a baby my mother hired a woman to wheel me about, and I've been pushed for money ever since."

Miss Frost: "Before we drive any farther I want you to understand that I don't flirt, so don't try to hold my hand or kiss me. Is that clear?"

"Yes."
"Now that that's settled, where shall we go?"
"Home."

"Well, Willie, your sister and I are going to be married. How's that for news?"

"Shucks! You just finding that out?"

A woman went to a domestic servants' agency and landed what looked to her like an ideal maid. She described the household duties to her, adding: "In our house, it has always been a custom to have breakfast in bed."

"Is that so?" was the chilled reply. "Yours or mine?"

The production manager was interviewing a man for a job. "How long did you work in your last place?" he asked.

"Fifty years."

"How old are you?"

"I'm thirty-five."

"How could you work fifty years when you are only thirty-five now?"

"Overtime!"

At an officers' club in London the members were bidding farewell to a man leaving for the Far East.

"It gets very hot out there at times," suggested one member. "Aren't you afraid the climate might disagree with your wife?"

The man looked at him reproachfully. "It wouldn't dare," he said.

Mother wanted to spend Saturday in town, and Father, an accountant, reluctantly agreed to give up his afternoon at a league football match, and spend the afternoon with the children. On the return of Mother, she was handed the following report.

"Dried tears—9 times. Tied shoes—13 times. Toy balloons purchased—3 per child. Average life of a balloon—13 seconds. Cautioned children not to cross street—21 times. Children crossed street—21 times. Number of Saturdays I will do this again—0."

Neighbor—Your baby is a cute little rascal. Does he take after his father?

Mother—Well, yes and no. His father is not quite so cute, and more of a rascal.

Do You Know That...

Rural people are more musically inclined than city folk and are less likely to discontinue their musical activities once they have started.

Actions speak louder than words.

"Night Traveller" Last Of Old Type Indians

NORTH BATTLEFORD, Sask. — Night Traveller, one of the last of the "old type" Indians, is dead. He wore long braids and a bright red kerchief around his head and walked with an air of dignity.

Night Traveller was a boy of 10 when the Crees made their peace with the Crown at Fort Carlton on the North Saskatchewan river, and to the end he placed his faith in Queen Victoria's word. He never considered the revised Indian Act as law.

At the close of each tribal meeting at the Little Pine reserve, Night Traveller would intone in Cree: "As long as the sun shines and the river flows, the promises of the Great White Queen to her Indian children will never be broken."

As a boy, Night Traveller was made to kill a buffalo by his father. At 18 he was a brave of the tribe and a sure shot. In the fighting at Cut Knife hill May 2, 1885, Night Traveller shouldered a rifle in defence of the Indians' way of life.

It is believed that Night Traveller may have left some of the legends of the Battle River Crees on record in syllables, the code invented a century ago by a Methodist missionary which gave the Indians their first written language other than sign writing. The legends hitherto had been handed down only by word of mouth.

Manitoba Turkey Preferred Weekly Newspaper To Dailies

WINNIPEG.—There was once a Manitoba turkey who preferred weekly papers to dailies—but it doesn't bother him now.

Mrs. Roxie Holmes, of Winnipeg, recently began to dismember a turkey that had been in her deep freeze since Christmas and discovered a rolled-up double tabloid page from a weekly in its stomach.

The paper was perfectly readable, untorn and dated March 6th, 1952. "You could have knocked me down with a feather," said Mrs. Holmes.

Korea is separated from Japan by 110 miles of water. 3031

Mrs. John Drainie Puts on Blue Bonnet — Finds it Best!

B.C. Salesman Has Own Plane To Make Calls

VANCOUVER. — Salesman Paddy Newon has a big territory to cover in British Columbia, stretching 700 miles from Vancouver to the northern centre of Stewart.

But it doesn't cause him too much trouble. He visits his customers by plane, piloting a four-passenger amphibian in his calls along the treacherous northern B.C. coast.

Paddy, who came from Ireland four years ago, is a drygoods salesman, and his plane has replaced a vessel, the Caribou, which plied the coast for 16 years.

He was a pilot, like three of his brothers, in the R.A.F. during the Second World War, and logged up many miles in the Far East—Singapore, China and India.

Paddy is the only salesman in B.C. to pilot his own plane. He works for a wholesale drygoods house.

BIG 4 SEED GRAIN DRESSINGS!

THE ENEMIES:

Smut, other Seed-borne Diseases, Wireworms—these crop-killers cost you and other grain-growers thousands of dollars every year. This is a needless loss because they can be controlled by proper treatment of seed before it's planted.

THE ANSWER:

the Green Cross Big 4 Seed Grain Dressings—a complete seed treatment program that includes the tested and proven dressings you need to protect your crops from the pests found in your area.

1. MERLANE

the amazing new combination seed disinfectant that controls smut, other seed-borne diseases and wireworms in one operation! Costs less than \$1.10 per acre of wheat, coarse grains, and less than \$1.10 per bushel of corn and beans!

2. SAN

another great new seed disinfectant that controls smut and other seed-borne diseases in wheat, coarse grains and flax! Application cost is less than 5¢ per bushel of wheat and coarse grains and less than 13¢ per bushel of flax!

3. BUNT-NO-MORE

the non-mercurial seed disinfectant that kills bunt (stinking smut) in wheat! Apply it for less than 4¢ per bushel!

4. 50% LINDANE

the proven seed dressing that destroys wireworms attacking cereal crops. Costs less than 95¢ per acre!

If you prefer a liquid seed dressing order Green Cross LIQUI-SAN, PMA Solution

Saskatoons For Your Gardens

Two named strains of high quality native Saskatoons are being introduced by the Beaverlodge Experimental Station, report J. A. Wallace and V. Chanasyk, Experimental Station, Beaverlodge, Alberta. They will be welcomed in prairie and northern home gardens where they will provide growers with a fruit they have favored since the pioneering days of the West, and where it may be difficult to produce cultivated fruits. It is fortunate that the Saskatoon responds well to cultivation since the breaking up of virgin land is fast destroying the favorite patches that were so handy to the home.

The new strains have been named Pembina and Smoky, after rivers in the regions in which the original selections were discovered. They have been selected as the best of numerous species, strains and selections growing on the station for many years. The large, juicy pleasant flavored berries are relished for eating out of hand and as dessert. They are also desirable when preserved.

Maximum fruit quality is obtained when plants are spaced six to eight feet apart and the soil about them kept cultivated. Planted in this manner, the Saskatoon will produce an attractive loose hedge or screen, providing a profusion of colorful bloom during May. It is also valued for ornamental planting and when grown in windbreaks the abundant fruit produced attracts a wide range of bird life during autumn and early winter.

There are several disadvantages in propagating the Saskatoon by budding or grafting, such as the difficulty of obtaining suitable root stocks and the high cost of production. Thus the new originations will be distributed as seedlings of the original selections which are propagated vegetatively for seed purposes. Little of the quality of these selections will be lost, since it has been found in the work conducted at Beaverlodge, that 85 per cent. of the seedlings retain the high quality of the parents.

Pembina

This selection was discovered as an isolated plant (clone) in the Pembina River district of Barrhead, Alberta. The fruit is large, fleshy, slightly oval and is borne in fairly long clusters. The flavor is full, sweet and tangy. The bush is upright and slightly spreading, vigorous and productive and produces comparatively few suckers.

Smoky

This strain was selected from plants growing in the native state on the station and was previously listed as B.E.S. No. 9. The fruit is large, fleshy, round, and is borne in medium-sized clusters. The outstanding characteristic of the Smoky strain is the unusually sweet, although mild flavor. The bush is high and spreading, which permits easy picking, but the form tends to hold the snow and this may cause some mechanical injury. Root sprouts are freely produced.—Western Producer.

ODDITIES In The News

Government cod-liver oil and orange juice for babies is delivered daily to a new housing estate by a mobile food office in Brighton, England. Mothers had complained the climb up a steep hill to the food office in town was too tiring.

Street trader Maurice Pearce was fined for obstructing a footpath in Feltham, Eng., while selling toys to children. "Every time I go out I get fined," he complained. He said it was his 500th fine since 1932.

Sixteen-year-old threadbare curtains have been replaced in the Camberwell marriage register office out of respect to Coronation Year brides. The curtains were hung in 1937, the year of the coronation of George VI.

Tired of shouting instructions a London swimming coach Herbert Wheeler fitted a tiny telephone to the ear of one of his pupils. Other swimming coaches said a revolutionary era of swimming instruction had begun.

Council of Findon, England, was informed that farm plowing had so narrowed an historic "lover's walk" that "two people cannot walk together". Investigation was ordered.

Sand And Gravel On Farms Belong To Landowners

EDMONTON.—The Supreme Court of Canada has upheld an Alberta court decision that sand and gravel on two Edmonton district farms belong to the landowners.

The judgment, in effect, also would uphold the Alberta Sand and Gravel Act, which specifies that surface rights owners also are entitled to sand and gravel rights.

Word of the decision was received from Ottawa recently by legal counsel for the two farmers — Joseph Gaumont, Fort Saskatchewan, and James Brown, Redwater—and Western Leaseholds Ltd., and Western Minerals Ltd., which claimed that ownership of mineral rights on the two farms also entitled them to the sand and gravel.

The case went to the Alberta Supreme Court in February, 1951, and Mr. Justice W. G. Egbert ruled that the sand and gravel belonged to the two Calgary companies. Shortly after this, the Sand and Gravel Act was passed by the legislature.

At that time the two firms contested the validity of the act. The Alberta appeal court then reversed Mr. Justice Egbert's decision, giving the sand and gravel back to the farmers and declaring the new act valid.

Last year the two firms petitioned the federal government, asking that the act be disallowed on the grounds it was unconstitutional. The application was rejected.

University Hospital, Saskatoon, To Receive Large Federal Grant

OTTAWA. — One of the largest grants to be made in Saskatchewan since federal aid for hospital construction began in 1948 has been awarded to the new University Hospital, Saskatoon, Hon. Paul Martin, Minister of National Health and Welfare, disclosed here.

The amount will exceed \$611,700, with an additional \$450,000 to be provided through the Department of Veterans Affairs toward the cost of a veterans' section.

This grant brings to more than 3,300 the number of beds added in hospitals throughout Saskatchewan with the assistance of federal health grants, Mr. Martin stated. Aid has also been given toward providing residences for more than 450 nurses. Total federal aid, including the grant from the Department of Veterans Affairs, either paid or pledged now exceeds \$5,000,000.

The new hospital and nurses' residence, under construction since late in 1947 and not scheduled for completion until June, 1955, will contain more than 770 beds. Of these 335 will be for general medical, surgical and obstetrical patients, and 100 will be reserved for war veterans in a special "veterans' section". Veterans will also have priority to 50 beds in other parts of the hospital. Nurseries are being provided for 52 infants; 65 beds have been allotted for the care of mental patients; and facilities will be provided for an out-patient department, blood bank, laboratory, pharmacy, x-ray and physiotherapy services. The nurses' residence will accommodate 272 nurses.

A color-blind person can see better in the dark than a person with normal sight. 3031

Canadian Fashion

(Women's Wear Bureau Photo)
Daisies form a diamond on the tucked yoke of Acme's dainty blouse. This Canadian design has the small collar outlined in flowers and the floral motif is repeated on the cuffs.

VALUABLE VITUALS, VEGETABLES

No diet can be considered well balanced without vegetables. Green and yellow varieties supply vitamins A and C, as well as niacin, riboflavin and thiamin. In addition, they provide iron, calcium and carbohydrates which offer a combination of nutrients necessary in a balanced diet. It is always a good idea to serve one vegetable raw.

Some rolling mills can deliver 2,000 feet of strip steel a minute.

Weekly Tip

USE BLEACH TOO

Mix bleach with your scouring powder for a paste that whitens sinks and bathtubs as it cleans.

::: APPETIZING RECIPES :::

Above: A treat for the eyes and the appetite is a tender Lamb Stew flavored with vegetables and topped with feather-light dumplings.

Lamb Stew and Dumplings

Two lbs. lamb breast, cut in 1 to 2 inch pieces, hot water, 6 potato halves, 6 carrots, sliced, 6 whole small onions, 3 stalks celery, sliced, 4 tbsp. flour, salt, pepper, 3 tbsp. fat.

Roll stew meat in flour. Brown in lard in heavy stew kettle or Dutch oven. Sprinkle generously with salt and pepper. Add water

to cover, cover pan, and simmer for 1½ hours. Add carrots, onions, potatoes, celery and 1 tsp. salt; cook 45 minutes longer. Drop dumplings into simmering stew by tablespoons and cover tightly. Cook for 12 to 15 minutes without removing the cover. When the dumplings are cooked, remove to warm plate and thicken stew if desired.

Important Factor In Drilling Oil Wells

CALGARY.—The woman who does the laundry and mops up floors won't agree, but science has found a use for mud.

Add a few chemicals to mud, doctor it up a bit, and it turns into an important factor in the drilling of oil wells.

As used in the oil-drilling business, mud has many functions. It helps overcome gas, oil and water flows and keeps the drill hole free of cuttings. It prevents walls from caving in and serves as a protection for producing formations during the drilling process besides gathering a little information.

The technology of drilling mud has developed into a science since its full use was first suspected back in 1901. There are mud engineers to make it perform. Most are trained by private companies since few universities offer courses in mud engineering.

The mud engineer can tell by samples and delicate instruments just what is going on at the bottom of the bore hole. Some have set up small laboratories in their cars and have been known to stay on the site for days working on a well.

RECREATION IS GOOD MEDICINE

As an aid to mental and physical health everyone, from childhood to old age, needs recreation of some kind. The school athlete benefits from his sports while the less strenuous hobbies of the older person are usually more sedentary sparetime occupations. Whatever form of recreation is chosen, it should differ from the daily job as much as possible in order to provide interest and relaxation. Those whose daily work keeps them indoors should, if possible, choose an outdoor hobby; gardening, an ancient favorite, provides exercise, interest and fresh air and is usually beneficial from childhood to old age. Handicrafts, a more restful form of relaxation, cover a wide range of interests. The public library can usually supply many books on this subject.

National League Hockey Notes

Three Players With More Than 100 Minutes

Three National Hockey League players had incurred more than 100 minutes in penalties in games up to the morning of March 14. The loop's "Bad Men" were Maurice Richard, Canadiens, 108 minutes; Fern Flaman, Toronto defenseman, 106 minutes; and Ted Lindsay, Detroit, 104 minutes.

Where Richard Scored His 50

Maurice Richard scored almost one-third of his goals when he established a National Hockey League goal-scoring record of 50 goals in one season, against Detroit Red Wings. When Richard scored his 50 goals during the 50-game 1944-45 schedule, he notched 16 against Detroit, 10 against Boston, and eight each against Toronto, New York and Chicago.

Orange Sweaters for Officials

The conventional white sweater worn by referees and linesmen for so many years is now a thing of the past in the National Hockey League. From now on the attire for N.H.L. referees and linesmen will be orange sweaters trimmed with black. The orange sweaters stand out from the white uniforms worn by the home team.

Penalty Increase This Year

The six National Hockey League teams show an increase in the time their players spent in the penalty box this year by two hours and 15 minutes. Total minutes tabulated by the six N.H.L. clubs in games up to the morning of March 14 a year ago amounted to 3718. Total minutes racked up for the same period this season was 3853. The clubs this season incurred 135 minutes more than for the same number of games last year.

Lineage Of Queen Elizabeth Traced To Third Century

LONDON.—Queen Elizabeth scored a great genealogical victory when Burke's Peerage announced it had succeeded in tracing her Royal lineage back to King Woden in the Third Century.

This, said Leslie G. Pine, editor of the authoritative directory of the British peerage, gives the Queen the longest "proven" pedigree in the world.

The challengers for the title—the Emperors of Ethiopia and Japan—cannot possibly provide anything like the documentary proof available to the 26-year-old head of the House of Windsor, Pine said.

Emperor Haile Selassie of Ethiopia claims direct descent from King Solomon and the Queen of Sheba, "largely based on legend", Pine said.

There is no question about the Queen's direct descent from Egbert, King of Wessex and All England in 827, Pine said, and the Queen is the 60th Sovereign since he reigned.

Smile Of The Week

Golfer: "I'm anxious to make a good shot here. That's my mother-in-law up on the clubhouse porch." "Don't be a fool. You'll never hit her at 200 yards."

HUGH BUCK, a 53-year-old blind man of Sherbrooke, Que., sightless for the last 10 years, returned to Montreal with a new pair of eyes. A month ago Hugh went to Los Angeles to meet Janet, a 14-month-old German Shepherd, at International Guiding Eyes Inc., a philanthropic organization which gives, without cost, a trained pair of eyes to any person in Canada or the U.S. who can give the dog a good home. Man and dog are trained together and during this month long period the blind pupil's room and board is free of charge. In the photo above Hugh Buck arrives in Montreal with Janet. At left is TCA Stewardess Ida Meier of Winnipeg.

DOOM TOWN IS SACRIFICED FOR SCIENCE — What effects the possible explosion of an A-bomb will have on the average family is one of the questions U.S. atomic officials are trying to answer in the current series of tests which started with the recent exploding of an A-bomb from a tower in Yucca basin, near Las Vegas, Nevada. The bomb gushed its ghastly light and killing wallow, equal to 15,000 tons of TNT over Doom Town, a replica of an American community, and turned the pale pre-dawn of the desert into that of a blinding noon. An ugly mushroom cloud then rose up from the centre of the little mock community, sacrificed for science, with its houses, 50 test cars, including one seen above, and realistic-looking mannequins, seen below in the living room of one of the houses constructed well within the danger area. Meticulous care was used in selection of subject matter to be exposed, even to articles of clothing worn by the mannequins. — Central Press Canadian Photos.

HEIFER BOASTS THREE SETS OF TWINS IN THREE YEARS—Mollie Rag Apple Waldorf, a four-year-old Holstein heifer, owned by Victor Reid, of Anten Mills, on outskirts of Barrie, Ont., has performed the unusual feat of producing three sets of twins in three years. This is believed to be quite a rarity as Mollie is not a twin herself. Unaware of all the commotion they have caused, Mollie's latest additions to the family are enjoying a visit from Doreen McGinnes, a neighbor of "theirs". — Central Press Canadian.

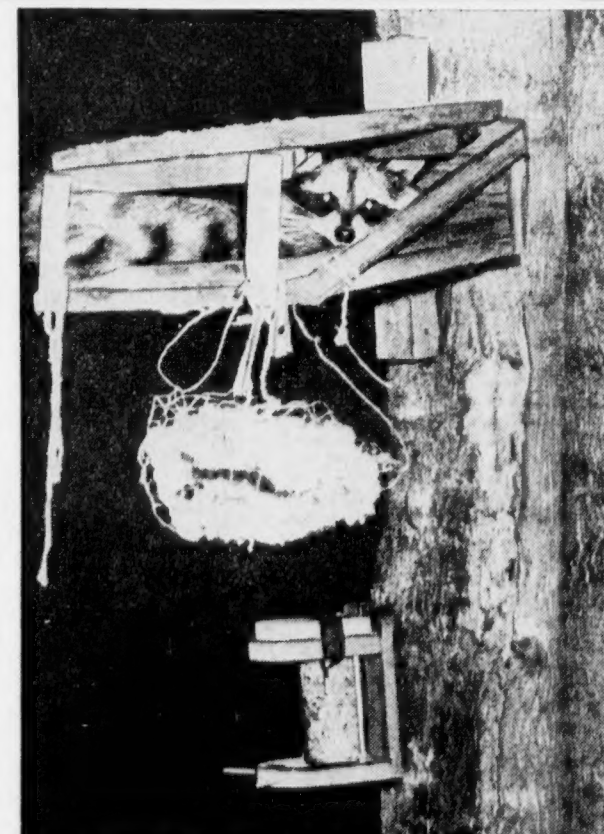

DISCOVERER OF NORANDA DIES AT AGE 87—A Nova Scotia farm boy, who discovered one of Canada's most prolific mines after 40 years of lonely toil, died at Halifax recently at age of 87. As a wiry, raw-boned prospector, E. H. Horne roamed the wilds of North America—from Labrador to Nevada and California to the Yukon—in search of gold but found fame and fortune in a base metals deposit which today is named Noranda. He was nearly 60 at the time of the strike, situated in Quebec near the Ontario border and was on his last grubstake after trekking and canoeing across Labrador and northern Quebec. Horne then sold his option to Noranda for \$280,000, married and brought his wealth back to his native Enfield, where he ended his days raising one of the finest Hereford dairy herds in Canada. — Central Press Canadian.

CHOSEN ALONG WITH 31 OTHER SCOUTS TO ATTEND CORONATION—Among those Canadians lucky enough to attend coronation will be Robert L. Williams of Harrison, Ont., one of 32 Canadian Queen Scouts chosen to represent organization at famous event on June 2 in London. Total of 14 young men from Ontario are scheduled to cross the Atlantic for the historic ceremony. — Central Press Canadian.

TEA-TIME AT WHITE HOUSE — President Eisenhower chats with Madame Chiang Kai-shek, wife of the Chinese Nationalist leader on Formosa, at a tea held at the White House for her by the chief executive and his wife. Mrs. Shek has been in the U.S. for some time receiving medical treatment for a skin disorder. — Central Press Canadian.

CULPRIT DISCOVERED—Suet that Mr. and Mrs. Clement K. Kohler, of Minneapolis, Minn., have been putting out for the birds this winter at their home, has been disappearing much faster than the birds could nibble it up. The culprit was discovered recently when this raccoon was caught guiltily peering from a bird rest above the basket of suet and a jar of seed—perhaps too overfed to make a getaway. — Central Press Canadian.

Off Season Sports For Hockey Players

Few hockey players realize just how much they can help improve their hockey skill by playing the right kind of games and taking part in the right kind of activities in the summer and fall. So, if hockey is your big game and you are especially anxious to do all you can to develop more skill, make sure you follow the listed suggestions carefully. First, you should realize that if you do play the right games and take part in the right activities, you will improve your hockey because you will be developing the same muscles and types of co-ordination and movement that you use in hockey. Then, too, you will be building up a "condition" that will carry you through your next hockey season with greater power and stamina than ever before. You will get into shape for hockey sooner and with greater ease when next season gets underway and you will tire less easily all during the season. Participation in any sport is good for your hockey, of course, but there are some games and activities that are especially helpful.

The best off-season activity for a budding hockey star is, without a doubt, track and field, especially the "short sprints" and broad jumps. These events will develop more of that all-important leg drive — that "drive" that every hockey player needs. Such running events as the half mile and mile will help you to improve your general "condition" and stamina and will train you to force yourself to greater effort, a habit every athlete should develop but one that few have developed. Yes, regular track and field activity all through the summer will do a great deal to help your hockey. Even if you don't do very well in actual competition, your efforts will still be worthwhile because of the great training your body will get. Other good games for a hockey player to play are tennis, soccer, and lacrosse. All these games increase your co-ordination and balance, things which are all-important to the hockey player. If you are a goalkeeper, you should play lots of table tennis, badminton or handball, as these games demand quick action of hand and foot and will train your eyes and improve your power of close concentration.

These suggestions will really go a long way in helping you improve

BRITISH YOUTHS TO EXPLORE B.C. WILDERNESS

LONDON.—The annual expedition sponsored by the British Schools Exploring Society will send more than 50 British youths into British Columbia's mountain wilderness this summer.

Boys between 16 and 18 are to camp for a month in the Cariboo district, mapping and collecting naturalist lore for British museums.

From Montreal where the group is scheduled to arrive Aug. 4, the party travels to Vanderhoof, B.C.

Supplies will be brought from Britain.

The organizers hope to accommodate some interested Canadian youths.

Helpful Hints

Brushing the hair vigorously daily, helps to keep it clean. Washing the brush at least two or three times a week also helps keep it clean.

If dirt that has become ingrained and difficult to remove, try rubbing the spots with petroleum jelly, or any oily cream, allow to stand for a few minutes, then wash in hot sudsey water, using a soft nailbrush. Several treatments may be necessary for stubborn spots.

Good lighting helps to prevent fatigue and promotes safety. Work surfaces need enough light for good seeing both day and night. Light-colored walls of dull or semi-gloss finish are best for reflecting a maximum of light without glare.

Loose cotton gloves, of the gardening variety, worn when doing dusting and other household jobs, help to keep your hands "lily-white and soft. You will soon become accustomed to working with gloves on. Try it and see.

Why Smoking Affects Recovery

Smoking throws an extra load on your heart and lungs and thus interferes with the job they are trying to do on your recovery. It also shrinks the blood vessels which means your circulation will not be as efficient as it needs to be to do a good job in the recovery process. In other words, smoking directly after hard effort delays recovery because it throws a further load on the body.

Use a smoke as a reward for doing all the smart things first. Then, if you really must, have your smoke.

When you join Sports College you get a membership card and a free copy of the Research Guide, the official newspaper of Sports College, in which you will find further details of the many Sports College services, the instruction bulletin series for example, plus many interesting helpful articles and reports of the latest techniques and methods in the field of sports and fitness development. If you like you can request registration forms for your whole team, group, school or community. Remember, just send that note to: Sports College, Box 99, Toronto 1, Ontario.

Kitchen Meditations

By JANE DALE

THE TOWN CRIER

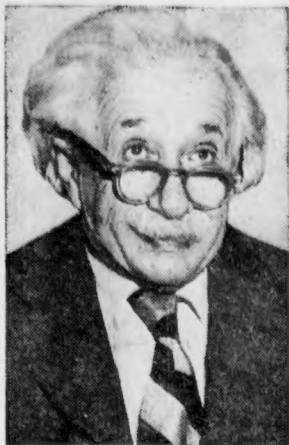

Oh, where is the little boy who used to ring the bell, Marching up and down the street with special news to tell?

Perhaps it was an auction sale. He calls, "starting right away!" Or maybe a thrilling picture show with children's matinee!

Whate're it was, that news he cried — he rang the bell full long Till all the people on the street knew by heart his song.

Oh, where is the little boy who used to ring the bell All along our old main street when there was extra news to tell?

Galileo was the first to use a telescope to observe the heavens.

—Central Press Canadian.

STILL BUSY AT 74—Caught in a rare moment, Dr. Albert Einstein, known as the father of the atomic age, is shown as he was interviewed by the press at a party celebrating his 74th birthday held at the Institute for Advanced Study at Princeton, N.J. One hundred community leaders from the U.S. and Canada were on hand to pay tribute to the brilliant scientist and professor at Princeton, who received, as one of his birthday gifts, the model of a new \$25,000,000 medical centre which will be constructed in New York and will bear the name Albert Einstein College of Medicine.

Calgary Man Owns Historical Coach

CALGARY.—Earl Gammon has a coach parked in his garage at Banff that's more than an heirloom. Its value has been estimated at \$25,000.

This is the coach that carried the Prince of Wales—later Edward VII—from Pictou to Truro, N.S., in 1860. Many years later it carried Queen Elizabeth, then Princess Elizabeth, and the Duke of Edinburgh at the Calgary Stampede grounds.

At the time of King Edward's visit the coach had been put on the Pictou-Truro run by an American named Hiram Hyde. Earl Gammon's father, William, bought it from Hyde for his stage-coach line from Pictou to Amherst.

When the railway put the stage-coach line out of business in 1890 the older Gammon arranged to have the old coach preserved. It was placed in a museum before it was shipped out west.

Gammon has always shown the coach in public at Banff with two horses, but it was designed for a team of four. Gammon says he has to get along with two because he can't find anyone who can properly drive a four-horse team.

WHAT IS A SCONE?
☐ A CAKE ☐ A BOAT
☐ AN OLD MAID

IN SOUTH AFRICA, A 6,000 POUND HIPPOPOTAMUS DEVELOPED WANDERLUST AND SET OUT ON A JOURNEY OF ONE THOUSAND MILES, FROM ZULULAND TO EAST LONDON, VISITING CITIES, PARKS, MONASTERIES, FARMS AND CABBAGE PATCHES ENROUTE. UNTIMELY DEATH AT THE HANDS OF A RIFLEMAN ENDED THE STRANGE ODYSSEY.

11-20

ANSWER: A thin cake baked on a griddle.

PRISCILLA'S POP—A Ray of Light

Garden Notes

For Amateur Gardeners

LOTS OF VARIETY

One of the fine things about gardening is the wide range of special interests. Anyone can soon become an expert along certain lines of his own choosing. Some people like to concentrate on rock gardens, others on window boxes, or an extra fine lawn of, say bent grass. Others go in for rare dwarf plants or special borders of various distinctive colors. Still others accept the challenge of shaded quarters and with tuberous begonias and other plants that actually prefer to keep away from the sun, they make a brilliant showing. The seed catalogues will help in choosing plants for any of these special purposes and, of course, for the more advanced there are all sorts of other literature. It gives one quite a thrill to be pointed as "That's the person on our street or in our town that grows the best of this or that".

AT THE BACK

For screenings, fences, vegetable gardens, walks and other places there is a wide assortment of quickly growing annual flowers. These plants will reach two to ten feet high in a few weeks and will make just as good a screen or background as permanent shrubs and hedges. In most Canadian seed catalogues along with the date of flowering, hardiness and other factors, will be listed the mature height and usually some indication of the speed these flowers grow. In the tall category are cosmos, hollyhocks, giant zinnias and marigolds, spider plants, ornamental sunflowers and many others. Planted well apart and in good soil these will form a blossoming background for the regular flowers and will hide practical bits of the backyard we do not wish every passerby to see. For the same purpose one can also use annual climbing things like nasturtiums, sweet peas, scarlet runner beans, morning glories, annual hops, etc.

MOVING

Transplanting is one of the most important and commonest jobs in gardening. Even the tiniest flower or vegetable plants sometimes have to be moved, to give them room to develop. When small practically anything can be moved if a few simple rules are followed. The main thing is to keep the roots undisturbed, to keep away from the air and to cover quickly and firmly with fine moist soil. Watering during and immediately after transplanting, unless the ground is very moist is essential and also if possible a little shade for the first few hours or a day or two. With big things like trees and shrubbery, it is also advisable to tie firmly to a stake to prevent the wind loosening. Where feasible and there are only a few things to move, one should do the job in the cool of the evening and preferably when there is no wind. Above all it is most important to cover the roots well and press the soil firmly around them. To speed growth and lessen the shock of moving sprinkle a little chemical fertilizer around but not actually touching the roots.

WHY WE CULTIVATE

Destroying weeds is only one of the reasons for cultivation. The big gain is the improvement in the texture of the soil. Cultivation lets in air, breaks up the soil, makes it more open, or as the experts say, more friable. Porous, loose soil will absorb and hold more moisture and will dry out much more slowly in dry weather.

EARLIER MATURITY

On the market are certain hormone sprays, which will make things like tomatoes, cucumbers, melons, etc., fruit faster and earlier and also very substantially reduce the number of seeds. So often in our climate the first blooms fail to set fruit or do so only in a limited way. That's where these special sprays come in handy but they must be used according to directions. They are fine for some plants but deadly to others.

Indo-China's Caodaists Fight Communism With 'Religious Army'

Troopers of the private army, raised, trained and maintained by Indo-China's Caodaists. —Central Press Canadian.

By HARRISON FORMAN
(CPC Correspondent)

Three million worshippers of Cao Dai (Supreme Being) are the most active anti-Communists in Indo-China today.

Caodaism was started only 25 years ago by a group of table-tipping Vietnamese in Saigon. The new religion, which received its teachings through the jiggling table and ouija board, spread rapidly throughout Indo-China. Today, its membership includes some of the most noted intellectuals and highest office-holders in the French-sponsored government of Viet-Nam (Indo-China).

Caodaism describes itself as a synthesis of all the world's major religions. It preaches that Christ, Confucius, Lao-tze and Buddha were "Messengers" from the same God

sent to earth at different periods to save mankind. All, therefore, are worshipped equally by the Caodaists.

The Caodaists' fervent belief in God has made them bitterly anti-Communist. While it is literally not safe to venture beyond the city limits of Saigon and most other cities in Indo-China today, in the 30-by-40 mile area controlled by the Caodaists (their capital is at Tay Ninh, some 60 miles from Saigon) one may travel freely without a weapon. Ho Chi Minh's Communists made one attempt to move in. They were soundly defeated—by the Caodaists themselves with no help from either the French or Viet-Nam regulars. Indeed, the Cao Dai district is a religious oasis in a vast desert of anti-God communism.

In the past two years the Caodaists have raised a private army num-

bering over 20,000 crack troops. It operates independently from the French and Viet-Nam forces. Its weapons may not be the best (they make their own rifles) but the training and fighting spirit of these God-fearing Caodaists, under the inspired leadership of 35-year-old Gen. Nguyen-Van-Thanh, is extraordinary.

A unique feature about this religious army is its propaganda corps. Some 50 or more artists work around the clock to prepare anti-Communist posters which are simple and graphic enough for an illiterate to understand. These posters are lithographed in their own plant and distributed in large numbers by an underground organization. The Caodaists pride themselves in being able to post them throughout the areas controlled by the Viet Minh Communists.

GEMS OF THOUGHT

FLATTERY

Men find it more easy to flatter than to praise.—Jean Paul Richter.

Consult thy everyday life; take its answer as to thy aims, motives, fondest purposes, and this oracle of years will put to flight all care for the world's soft flattery or its frown.—Mary Baker Eddy.

Flattery is often a traffic of mutual meanness, where, although both parties intend deception, neither are deceived.—Caleb Colton.

Imitation is the sincerest flattery.—Nathaniel Cotton.

No man flatters the woman he truly loves.—Henry Tuckerman.

When flatterers meet the devil goes to dinner.—Daniel DeFoe.

DOESN'T PAY — MUCH

TOKYO.—Tokyo police offered statistics proving that crime doesn't pay—very much. After questioning 3,351 criminals with at least six years apprenticeship in their trade, the police reported that burglars earned an average of 14 cents per day and pickpockets and petty thieves 10 cents a day.

Hotels in Iceland are heated by water from hot springs.

Pre-emptive calls are designed to obstruct the opponents, but the Swedish East-West pair were always in command of the situation on this deal from the 1952 European final.

The Italian South opened with Two No-Trumps, the usual system gambit on this type of hand. West bid Three Diamonds and North Three Hearts, doubled by East. South then bid Spades and North raised to Four, but East did not hesitate to contest with Five Diamonds. The Italians were driven to Five Spades doubled and one down.

The opening bid in Room 2 was One Spade only and the Italian West bid Diamonds twice, but with no response from his partner. South was left in peace to make Four Spades for a turnover of \$20.

Beauty Contest For 100-Year-Old People Under Way

WASHINGTON.—A new-type beauty contest is being conducted here—for men and women at least 100 years old. Prizes in the "Centenarian Beauty Contest", sponsored by a national radio network, are free trips to Hollywood and \$500 for "the most beautiful woman and the most handsome man 100 years or older."

No two zebras are striped alike.

AN EXPERT COOK

A publisher's son recently married a ravishing young thing who assured him she was an expert cook. Back from a Bermuda honeymoon, the young husband brought home some sausages and suggested they be served the next morning with the scrambled eggs. The bride confessed she'd never cooked sausages before. "Nothing to it," said the husband airily. "Just fry 'em like fish." Next morning the bride apologized, "I don't think you're going to like your sausages, dear. There doesn't seem to be much left to them after I cleaned out the insides."

On The Side : By E. V. Darling

In North America, even when both are the same age or thereabouts, most wives look from 10 to 15 years younger than their husbands. In Great Britain it is different. Most Englishmen are older than their wives, but manage to look from five to 10 years younger than their matrimonial mates. This is just because Englishmen take more pride in their personal appearance than the males of any other nation in the world.

Frank Opinions

I believe: No effort should be spared to produce a kiss-proof, drinking glass-proof, napkin-proof, cigarette-proof lipstick. The way the currently used lipstick smears up things is revolting. All race tracks should have three-dollar "across-the-board" combination tickets. Children should have a legal right to change the names their parents give them. Especially children named Edgar. All printed contracts should be in large print. Women should not be required to have their exact ages on their automobile driving licenses. "Over twenty-one" is sufficient. Cats and canaries should be required to have licenses same as dogs.

What's Your Beel?

Typewriter ribbons fade faster than formerly. Safety razors are duller than before. Nylon hosiery suffers from runs speedier than previously. Shoes wear out in half the time. These are complaints constantly received by this department. How widespread is this alleged state of affairs? What is the cause of it? Can it be due to a desire to speed up the turnover of products and thus increase profits? Is it really good business? Wouldn't manufacturers who make things to last do better in the long run?

Catching Up To the "Little Woman"

What is the height of the heels on the shoes worn by the average woman? About three inches, isn't it? Therefore, it seems some men are making a desperate attempt to give themselves an appearance of height. Now there are height-building shoes for men with three-inch heels. Still, perhaps the men cannot be blamed. Perhaps they have a fond regard for some tall women. And you know how those tall girls are always expressing a wish to have to look up instead of down at their escort.

Change From Dog-Catcher Van

Ever hear of an ambulance for the exclusive use of injured dogs? There is one in London operated by the theatreland animal hospital. This institution was founded and is financially backed by a group of well-known theatrical people. When a dog is injured, for example, by being run over, the dog ambulance is called. It puts off at top speed from the hospital and picks up the injured dog just as if the accident victim were a human being.

Briefly Speaking

Those who have six or more children rarely have an even division of sex. However, I know some people who have eight children—four boys and four girls. . . . The Scots are the world's shrewdest business men. In Glasgow they are even selling money at a profit. There is a shortage of shilling coins. These coins are needed for gas meters. So shilling coins are sold to housewives at a profit. . . . Have you your enunciation under control? Could you qualify as a high speed announcer? Give yourself a test. Repeat the following sentences each six times at high speed without making a mistake in pronunciation—"The short sort shoot straight". "Old oily Ollie oils old oily autos".

Share a Man

There are 1,500,000 more women than men in Great Britain. Don't know how many more women than men there are in Germany, but in Berlin alone there are 325,000 more females than males. In Sweden, too, there is an excess of women. It is said some Swedish women are now following a "share a man" plan. The trio occupies the same place of residence. One woman goes out to work, the other handles the household duties. In Germany there is a campaign on to make the "share a husband" idea legal. Anyway, mister, you might tell your wife to consider what a lucky woman she is to have you all for herself alone.

HEALTH

WE SHOULD START AT AGE 40 TO PREPARE FOR RETIREMENT SAYS INDUSTRIAL PHYSICIAN

Until they have passed the age of 55, most people won't give serious thought to what they will do when they retire, in spite of the fact that they should begin when they are 40 to condition themselves for retirement.

"Even the distress of friends who have retired at age 65 or earlier often does not change the attitude, 'It will not happen to me,'" comments Dr. R. B. Robson of Walkerville, Ontario, in his article in the current issue of Health.

"There is a deep-dyed idea in the minds of many people that there is something not entirely respectable about growing old," he adds. "The idea is fostered very greatly by the advertisements for all kinds of nostrums which claim to help one mask the advancing years, and the hormones and vitamins, hair dyes and cosmetics, and all the host of products which are glibly prescribed to make one feel young."

Dr. Robson, who is medical director for the General Motors Corporation at Walkerville, points out that 30 years of medical practice have shown him that longer life is not necessarily a key to happiness for many men and women. Often longevity yields nothing but disillusionment, worry and distress, and the number of such unhappy cases is multiplying rapidly—hastened both by the increasing life span and by the tendency of industry and business toward compulsory retirement at 65.

The solution to this multiplying unhappiness of the aged is not to be found in economic security and the aid of paternalistic agencies, in the view of Dr. Robson, but in individual preparation for old age.

"No federal, provincial or industrial relations plan in our country can dictate the thoughts and behavior pattern of any one individual—whether he be possessed of courage or fear, loneliness or contentment, physical and mental health or ill health," he observes.

Dr. Robson then goes on in the article, "R Day Can Hurt You if You Don't Prepare", to outline instances of how his experimental plan at General Motors has assisted workers in reducing the frustrations of the changeover period from active daily work life to retirement.

POPULATION OF U.S. TOTALS 158,657,000

WASHINGTON.—The U.S. population increased 209,000 during January to a total of 158,657,000. This estimated from the census bureau included armed forces overseas. It represented an increase of 2,693,000 since February 1, 1952.

NO FIRST ROBIN PROBLEM

MANNS HARBOUR, N.C.—Robins may still be scarce in the north, but these harbingers of spring are plentiful on the Dare County coast. The birds remain in this area throughout the winter, feeding on berries and insects.

World Happenings Briefly Told

The United States has signed a contract for the purchase of \$11,000,000 worth of minesweepers from Britain for allocation to NATO countries.

"The city on the Water" is the theme for celebrations this summer of Stockholm's 700th anniversary. The Swedish capital plans many events including an opera and drama festival from June 3-10.

Sydney Smith, 72-year-old electrician of Molesey, England, has developed a radio-controlled clock which will be manufactured. The clocks are controlled by a master station sending impulses on a low wave-length.

Agriculture Minister Ure said that the Alberta government will spend "a very large sum of money" on a rabies control program during the next year. The disease, spread by wild animals, has been spread from the northland to near Edmonton.

Ranchers say that cougars and timber wolves are becoming more plentiful in the Rocky Mountain foothills because the bounty of \$15 is not high enough to persuade many hunters to go in chase.

Cocoons have been ordered from Canada and India for a display of exotic silk-moths at London Zoo this summer. Canadian species will include oak, robin and alanthus moths.

A new machine introduced in Cleveland, Ohio, by Charles E. Jones records the fingerprints of persons cashing cheques and is said to eliminate the need for other identification. The ink used is odorless and stainless and invisible on the fingers, according to Jones.

Britain will give the Middle Eastern state of Jordan \$3,500,000 in 1953 to aid a five-year plan of economic development.

Exchange Jet Planes For Surplus Cotton

RIO DE JANEIRO, Brazil.—The first jet fighters of the Brazilian air force, 70 in all, will arrive here from Britain early in April.

The aircraft are twin-engined meteors, new off the production line of the Gloucester Aircraft Company, and were obtained by the Brazilian government in exchange for surplus cotton.

"So far as we know," a British official here said, "this is the first time in history that an aircraft company has taken cotton in exchange for its product."

PEACE GARDEN AID

Representative Usher Burdick, North Dakota Republican, has introduced a bill in the U.S. Congress to authorize an appropriation of not more than \$100,000 to help complete the International Peace Garden in North Dakota on the United States-Canadian boundary.

Spring Lamb

OUR COMPLETE SHORT STORY—

Too Late, Too Late

Randall Was in Hospital a Lot Longer Than He Expected.

By WALTER E. KLEIN

RANDALL opened his eyes, and stared with sudden fear around the spotless, strange room. A dull ache throbbed at the base of his head. He caught a glimpse of the calendar. The 25th. The anxious beating of his heart subsided a little. He looked at a clock, that stood on a small table beside him. Three o'clock. That meant it hadn't gone off yet. In fact he still had a whole hour.

A door opened, and a white-clad girl strode in. "Oh, so you're awake," she said, brightly. "How do you feel now?"

Randall tried to sit up and groaned. He sank back against the pillow. He remembered now; the screech of brakes, a honking horn, a woman's scream, silent darkness. A jolting ride, that jolted him into confused wakefulness, then darkness again. He must have been in an accident! The revelation came to him with a shock.

"Well, well, what have we here?"

A doctor came to the side of the bed, making clucking noises. He peered professionally at Randall. The doctor picked up his hand. Randall wished the officious fool would go away. He wanted someone competent. Randall liked competent people, even if he had to pay well for their services.

"Hmm, seems all right."

The doctor's fingers probed him, touching bruises here and there. Randall winced. Rage gathered in his heart. Why didn't they get someone competent!

"Well, young man, guess you're all okay. Just shaken up. We'll have you out of here in no time. Got to make room; lots of patients, you know. Too many."

Was that the only excuse they could give him, for putting him in this cubbyhole? Randall liked luxury, even in hospital rooms.

The doctor bustled off, still clucking.

Randall watched him go with a contemptuous smile on his lips. He took another glance at the clock, 3:15. Only forty-five minutes to go. Excitement stirred in his breast.

Lucky the accident had happened when it did. It might even come in useful. He'd been too excited when he'd dashed away from the warehouse, and hadn't been watching his step, or it would never have happened. Randall never had accidents.

But, anyhow, this one had happened opportunely.

If he'd woke up like this, in a hospital, the week before, he'd have been terrified. The thought of the bill alone would have started his heart

pounding with fright. Last week Randall was flat broke, with no plans. He was still broke, but he'd made plans. He wouldn't have to worry anymore. In forty-five, no, only thirty-five minutes, he'd have more than enough money to pay all his bills, and give him a new start. The insurance money would take care of that.

He turned over and went to sleep. He'd wanted to be awake at four o'clock, but the accident and his previous labors had exhausted him. He slept soundly.

At five o'clock he awakened to find he had a visitor. He smiled when he saw the time. His visitor was Wiggins, his mousy, male secretary. "Mr. Randall, oh my, this is terrible!"

"Well, man, out with it!" Randall's heart thumped. Had it worked? Of course it had; Wiggins wouldn't be here if it hadn't.

"Your warehouse, it bur . . . maybe I shouldn't tell you in, in your condition . . ."

"Never mind my condition! Out with it!"

The secretary's eyes were bloodshot. "Your warehouse burned down!"

Randall sighed in relief. All his plans had gone off properly.

"What!" roared Randall, "how'd it happen, man? Was anything salvaged? Was anything, er, wrong discovered? There was no reason for that building to burn. Someone was careless! Someone will have to pay!"

"No, oh no, Mr. Randall. It burned down completely! Nothing's left. It was awful!" Wiggins caught his breath. "I didn't tell you the worst of it. I meant to tell you yesterday, but you were talking about not having any money on hand, so I . . ."

A knife pang of fright seared Randall. "What did you say? Come, come, man!"

"You didn't give me any money, and so I . . ." Wiggins retreated a step as he caught sight of Randall's contorted features. "I, I'm really sorry, Mr. Randall, but it wasn't my fault. You see, your fire insurance policy lapsed yesterday. I didn't renew it for you. I would have, but I . . ."

Randall was in the hospital a lot longer than he expected.

INVENTED IN 1894

Favrile glass was invented by Louis Tiffany in 1894. It is a variety of iridescent enamelled glass.

TO LEAD SCOUTS' CORONATION CONTINGENT—In charge of Canadian contingent of Boy Scouts that will attend the coronation on June 2, will be Scoutmaster J. Barry Gale of Shawinigan Falls, Que. Scheduled to sail for England on May 18, the group, comprised of boys from all across the country, will return toward the end of June.

Looks Like Good Year For Tourists

VANCOUVER, B.C. — Leo Dolan, chief of the federal government travel bureau, says more Hawaiians than ever before are looking to Canada as a vacation spot.

Dolan, reporting on his 10-day tour of the Pacific island, said 60 per cent. more Hawaiians intend to vacation in Canada this year than in 1952.

"From what I saw in Honolulu at the Pacific Area Tourist Association Conference, I'd say tourists will head into Canada from all parts of the world this summer," he said.

Dolan has headed the government travel bureau since its organization 10 years ago.

Fashions

Slimming Ensemble

For a Mother of the Bride, for any special event—this! Dress is simple, slenderizing, has that flattering deep yoke which looks its loveliest in contrast. Bolero is brief and boxy. Make this twosome now, enjoy it until summer!

Pattern 4696: Women's Sizes 34, 36, 38, 40, 42, 44, 46, 48. Size 36 dress and bolero, 4 yards 39-inch; 7/8 yard contrast.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

TO CUT ACCIDENTS

Don't Speed, Be Courteous, Drivers Told

A spokesman of the Montreal Traffic Safety Council says: "Statistics and common sense prove that too much speed and bad motor manners are the chief factors in the majority of accidents. The human element is the problem."

"As for good motor manners, it simply means that drivers should be as courteous behind the wheel as they are in the office or at home."

The Safety Council listed the following suggestions for would-be courteous and accident-free motorists:

1. Give pedestrians time to get out of your way;
2. At night, lower your lights when meeting other cars;
3. Yield the right of way, even though the other fellow may be wrong;
4. Overtake and pass only when you are sure you can do so with safety to other cars as well as your own;
5. Watch out for children—let them cross safely. Especially, know and obey local regulations about stopping for school buses when children are getting on or off;
6. Adjust your speed according to conditions of weather, road and time of day;
7. Don't be a road hog. Keep to the right.
8. Don't "horn" your way through traffic.

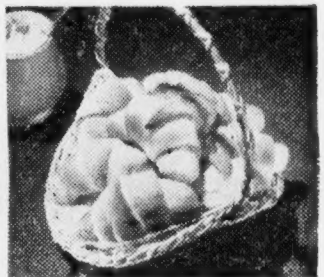

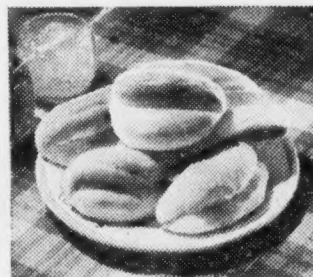

Exporting Gas On "Province First" Basis

REGINA. — Saskatchewan has decided to export her natural gas but only on a "province first" basis.

Announcement of a gas export policy was made in the legislature by Resources Minister J. H. Brockelbank. The policy follows the same general pattern as that laid down in the House of Commons by Trade Minister Howe.

4 delicious treats ...make them from One Basic Dough!

It's amazingly simple with wonderful active dry yeast!

If you bake at home, find out the wonderful things you can do with Fleischmann's Fast Rising Dry Yeast! Serve fragrant rolls or fancy breads in variety from a single dough! Always get Fleischmann's Fast Rising Dry Yeast — it stays fresh in your cupboard, and acts fast in your dough!

Needs no Refrigeration

BASIC ROLL DOUGH

Scald
1 cup milk
5 tablespoons granulated sugar
2 1/2 teaspoons salt
4 tablespoons shortening

Remove from heat and cool to lukewarm. In the meantime, measure into a large bowl

1/2 cup lukewarm water
1 teaspoon granulated sugar
and stir until sugar is dissolved. Sprinkle with contents of

1 envelope Fleischmann's Fast Rising Dry Yeast

Let stand 10 minutes, THEN stir well; stir in cooled milk mixture and

1/2 cup lukewarm water

Stir in

3 cups once-sifted bread flour

and beat until smooth and elastic; work in

3 cups more (about) once-sifted bread flour

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 4 equal portions and finish as follows:

1. PARKER HOUSE ROLLS

Roll out one portion of dough on lightly-floured board to 1/2-inch thickness; cut into rounds with 3-inch cutter; brush with melted butter or margarine. Grease each round deeply with dull side of knife, a little to one side of centre; fold larger half over smaller half and press along the fold. Place, just touching each other, on greased cookie sheet. Grease tops. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 6 rolls.

2. CLOVER LEAF ROLLS

Cut one portion of dough into 8 equal-sized pieces; cut each piece into 3 little pieces. Shape each little piece of dough into a ball and brush with melted butter or margarine; arrange 3 balls in each greased muffin pan. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 8 rolls.

3. FAN TANS

Roll out one portion of dough on lightly-floured board into a rectangle a scant 1/2-inch thick; loosen dough, cover and let rest 5 minutes. Brush dough with melted butter or margarine and cut into strips 1 1/2 inches wide. Fold 7 strips one upon the other and cut into 1 1/2-inch lengths. Place each piece, a cut side up, in a greased muffin pan; separate the slices a little at the top. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 8 rolls.

4. CRESCENT ROLLS

Roll out one portion of dough on lightly-floured board into a 14-inch round; brush with melted butter or margarine and cut into 12 pie-shaped wedges. Roll up each wedge of dough, beginning at the outside and rolling toward the point. Arrange, well apart, on greased cookie sheet; bend each roll into a crescent shape. Brush with melted butter or margarine and sprinkle with salt. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 12 rolls.

"SALADA" TEA BAGS

THE TILLERS

—By Les Carroll

Level Land

Mrs. F. Tetz of Trochu was visiting with the S.D.A. church and friends on April 4th.

Pastor and Mrs. J. I. Crawford of Calgary were with the S.D.A. Church April 4th.

Mr. and Mrs. Fritz Moerke and Mrs. Sell of Kathryn were visiting with the S.D.A. church and friends.

Ralph Seland of Calgary was visiting with the S.D.A. Church and friends. Mr. Seland is taking Education in Calgary and will start teaching in April.

Pastor and Mrs. A. Kuyaht of Kelowna, B.C. are visiting with their daughter and son-in-law, Mr. and Mrs. E. Neher of this district. Pastor Kuyaht was Pastor of the Carbon Baptist Church for many years and later for several years at Trochu before going to B.C.

Miss Glenda Gimbel and Larry Leiske of this district attended the annual music recital of Moleis Piesce School of Music which was held at the Al Azhar Temple in Calgary Mar. 23. Glenda and Larry gave a two piano duet "Minute Waltz" by Chopin. After the program the pupils were presented with certificates and rewards.

Mr. and Mrs. A.A. Roth of Calgary and Mrs. J. Patzer were visiting with the S.D.A. Church and friends over the weekend.

OBITUARY

GOTTFRIED HEIN

The death occurred Friday at the home of John Harsch where he was visiting of Mr. Gottfried Hein of Kelowna, B.C.

Mr. Hein, 64, came to Alberta to attend the funeral of his brother in Hanna and was visiting relatives in Carbon at the time.

Mr. and Mrs. Benny Huether and Carol were visiting over the weekend at Lacombe and Canadian Union College.

of his death. He was retired and had been living in Kelowna for some time.

He is survived by his wife, one daughter and two grandchildren; one brother in North Dakota, two in Canada, and a sister and brother in the old country.

Funeral services were conducted in the Carbon Baptist Church on Wed., April 8 by Rev. Kugath of Kelowna and Rev. Faul of Calgary. Interment took place in the Carbon Baptist cemetery.

So Different an entirely new kind of Chevrolet to be compared only with higher-priced cars!

THE STRIKING NEW BEL AIR 4-DOOR SEDAN
(Continuation of standard equipment and trim illustrated is dependent on availability of material.)

new Chevrolet *Bel Air* series

A General Motors Value

Heading three great new lines of Chevrolets for '53

Now, in the Bel Air series, Chevrolet creates for you a new class of Canadian cars. Here is distinction of appearance and fineness of appointments far beyond anything in Chevrolet's field. Here is your opportunity to own a truly distinguished and luxurious car without paying the price premium formerly associated with such high quality.

The Bel Air series includes four models — 2-door and 4-door sedans, sport coupe and convertible. Each of them is in a class by itself for beauty, comfort and luxurious appointments. Twelve other beautiful new Chevrolet models are included in the "Two-Ten" and "One-Fifty" series, providing a new Chevrolet for every buyer and every need. All of these new Chevrolets are as advanced

in performance as in appearance. All give you new high compression power, greater gasoline mileage, more comfort, safety and durability. A revolutionary new Powerglide* automatic transmission, and GM Power Steering†, are among the great advances Chevrolet offers you. Come in and see all the new features that make Chevrolet for '53 entirely new through and through!

*Combination of Powerglide automatic transmission and 115-h.p. Blue Flame engine is optional at extra cost on "Two-Ten" and Bel Air models. †GM Power Steering is optional at extra cost on all Powerglide-equipped models.

Startlingly NEW... wonderfully different!
